

GRID WARE

Cybersecurity
for the US
Energy Sector

Security & Privacy First and Foremost

USGRDCO

US Grid Company

Fortify grid assets
against cyber attacks
with the nation's
most advanced
cybersecurity system
and leading edge
development teams
– trusted by the
US government to
protect the nation's
most vital assets.

80%

80% of grid attacks come from the inside and 20% from external sources. GRIDWARE is tactical cyberware to protect you from both. **Inside and out.** Hardware, software and service *all in one solution*. GRIDWARE also actively seeks out and isolates vulnerabilities and threats. How? (See overleaf)

How it works and what [REDACTED]

[REDACTED] [REDACTED] [REDACTED]

[REDACTED] to [REDACTED]

[REDACTED] and [REDACTED]

[REDACTED] in

the [REDACTED], [REDACTED]

[REDACTED] [REDACTED]

[REDACTED]

[REDACTED] to [REDACTED]

[REDACTED], but [REDACTED]

[REDACTED] [REDACTED]

[REDACTED] are [REDACTED] to

[REDACTED] and [REDACTED]

[REDACTED]lly unique to the energy sector.

Well... if we
told you how
it works it
wouldn't be

**SAFE, SECURE,
RELIABLE &
RESILIENT**

would it?

next steps... contact us directly

(and we'll arrange a demonstration
and knock your socks off!)
